Kevin,

Capistrano Toyota had their new NEC PBX installed in March of 2010. Our purchase is because of the excellent service we received when our sister store Claremont Toyota purchased a PBX in November 2007. As in the install at the Claremont store we brought some services in house which offset the monthly cost of the new system.

Intelesys worked very closely with me through all steps from the initial site survey through the install process. Their willingness to help did not stop after the install was done. For several days after the system was installed they made programming changes so that the systems would work to our specifications. It has been nearly two years after the install and their willingness to help has not ended. Their help has always been just a phone call away.

From my two purchase experiences with Intelesys I would not hesitate to my recommendation to any of their potential customers. I would strongly encourage them to select Intelesys.

Sincerely,

Wayne R. Hankins
Systems Administrator
